

Workshop on the Future of Heavy Element Research

on the occasion of
Sigurd Hofmann's 60th Birthday

Create the View for Superheavy Element Research in the next decade

Explore New Ideas, research fields, and experimental developments

Create and intensify collaborations

→ Optimum conditions for SHE research

→ Complementarity and synergetics with other labs

Consequences for GSI

Organization is informal

- Ample time for discussion
- Please come up with slides for new ideas and proposals during the discussion
- We collect viewgraphs or datasets to prepare a CD-Rom and a small brochure only for participants
- We will not put them on the WEB

Presentations

- For electronic presentations please contact **Dieter Ackermann**
- Talks can be downloaded to a dedicated laptop via **memory stick or CD**
